

MDT installation from repository

Go to your terminal and hit command line by line

Install curl:

```
sudo apt install curl
```

Add the repo:

```
echo "deb https://packages.cloud.google.com/apt coral-mdt-stable main" | sudo  
tee /etc/apt/sources.list.d/mdt.list
```

Add Google keys

```
curl https://packages.cloud.google.com/apt/doc/apt-key.gpg | sudo apt-key add -
```

Install the mdt package:

```
sudo apt-get update
```

```
sudo apt-get install mendel-development-tool
```
